BREEZE AERMOD Version 7.10.1

Release Notes

Bug Fixes:

- Fixed a bug in the Control window for regulatory NO₂-ARM and non-regulatory NO₂-ARM2 templates that caused the input Control Option to setup incorrectly
- Fixed a bug that prevented emission rates to be entered through the Data tab when using BREEZE Multi-Scenario Processor option for multiple pollutants
- Fixed a bug that caused AERMOD runs to fail when using certain hourly emission files created by Hourly Emission File Editor tool
