

Release Notes **BREEZE AERMET 7.9**

New Features

- Incorporated the latest [U.S. EPA AERMET executable 18081](#), released on April 24, 2018
- Added an option for 64-bit operating system users to select 64-bit or 32-bit AERMET

Bug Fixes

- Fixed a bug that prevented the ADJ_U* command to be written to the input file when the "Adjust surface friction velocity" option is checked
- Fixed a bug that unchecked the 1-minute ASOS wind data method when re-opening the .atz file
- Fixed a bug that prevented BREEZE AERMET to run as an administrator in the non-English Windows 10 operating system
- Fixed a bug that prevented the onsite data file to be recognized if the path and file name contained spaces
