

# Release Notes **BREEZE AERSCREEN 1.9**

## **New Features**

- Incorporates the latest [U.S. EPA AERMOD executable 18081](#) and [U.S. EPA AERMAP executable 18081](#), released on April 24, 2018
- Adds an option for 64-bit operating system users to select between running the 64-bit or 32-bit version of AERMOD
- Adds a warning message during the model run if AERMAP result does not contain the source elevation data

## **Bug Fixes**

- Fixed a bug that prevented BREEZE AERSCREEN to run as an administrator in the non-English Windows 10 operating system
- Fixed an issue that resulted in a failure to save the fumigation information
- Fixed a bug that caused an invalid path to the AERSURFACE output file
